FORUP

Student–Client Freelance Platform

Balancing study and work through smart matching

Team members:

Azib Ilina
Djaiz Oumaima
Elmas Salsabil
Maldji Rahma
Anes Senani

Startup definition:

FORUP is Student–Client part-time Freelance Platform that matches students with clients based on skills, availability, free time and task needs, helping students manage time and balance study + work

Key actors:

students, Clients, (companies/individuals), platform admins.

Opportunity identification: Students struggle to balance study and work .they need flexible jobs. Clients struggle to find affordable, skilled short-term help.

Ideation techniques: brainstorming session began with one team member proposing a wide range of ideas. While many did not fully align with our objectives, one concept stood out: a platform designed to help students balance their studies and work. After presenting it to the rest of the team, the idea was refined and strengthened through collaborative input and the addition of new features

Market research & validation:

• Survey Validation:

Caption: “Survey confirms students need flexible jobs that fit study schedules+Entrepreneurs with experience also validated the idea”

• Competitors:

Freework :

Freelance platform in Algeria (marketing, programming, design, etc.). → Not student-focused, no study/work balance.

Khaliha 3lina :

Mobile app for verified service providers (home services, freelance tasks). → General services, not tailored to students.

ForUp :

Student–Client freelance platform. → Unique focus: matches by skills + free time, helping students balance study & work.

- **Marketing & customer development:** Attracting Students: Social media (Instagram, TikTok), university clubs, word of mouth.
- Attracting Clients: LinkedIn, Facebook groups, local businesses.
- Acquisition: Student ambassadors, first-job discounts, referral program.
- Retention: Ratings/reviews, job notifications, loyalty rewards, quick support.

• Key Partners : Universities • Payment gateways . • Local businesses • Tech companies • platforms/courses • EdTech platforms	• Key Activities : App development & maintenance. • User acquisition (students & clients). • Quality control of tasks and freelancers. • Marketing campaigns. • Managing secure payments. • Customer support. • Partnership building with universities. • Key Resources: The mobile & web app (backend, frontend, database). • Matching algorithm (availability + skills + deadline). • Payment system. • Marketing team. • Student verification system (university ID, email). • Client verification & security tools.	Value Proposition: For Students: • A platform that matches them based on free time, not just skills — helping them manage studies + work without burnout. • Easy income opportunities. • Build a real portfolio and professional experience. • Safe, trusted clients with verified payments. For Clients: • Access to affordable, motivated, skilled student talent. • Fast matching: get someone available right now or in the desired timeframe. • Rating system to ensure quality. • Tasks done by young people specialized in tech, design, writing, tutoring, etc.	Costumer relationship: • :Automated matching system (AI-based or rule-based). • Customer support chat inside the app. • Rating and review system. • Tutorial & onboarding for new students. • Email reminders for tasks and deadlines. • Secure payment system to build trust. • Channels :Mobile app (main product). • Website dashboard for students + clients. • Social media marketing (Instagram, TikTok, LinkedIn). • Partnerships with universities. • Word of mouth & student ambassadors	Customer Segments: • Primary: University students who want part-time jobs/freelancing that fit their schedule. • Clients (individuals or small businesses) needing affordable skilled services (design, tutoring, social media, translation...). • Secondary: Startups looking for low-cost talent. • NGOs needing temporary support. • Universities wanting to integrate student job opportunities.
• Cost Structure : App development costs (frontend, backend, server). • Server hosting + cloud services. • Payment system fees. • Marketing ads. • Staff salaries (devs, support, marketing). • Legal & accounting. • Partnership agreements.			• Revenue Streams Students: Free at first. • Subscription only after 2 successful paid tasks. • Optional premium features (profile boost, analytics). Clients: Pay full task price upfront. • Money held in escrow until task completion. • App takes small commission (5–10%). • Full price always visible to client before payment. In-app ads : Partnerships with universities & companies.	

Business Plan Overview

A. Executive Summary:

ForUp connects students with job opportunities tailored to their available time and skills, supporting them financially while maintaining academic success.

B. Market Analysis: Targeting university and high-school students seeking flexible employment, with 67% of undergraduates working over 20 hours per week

C. Marketing Strategy

Social media marketing, university partnerships, and referral rewards to attract students and employers through digital channels

D. Operations Plan: Mobile app and website platform with user registration, job posting, time availability filtering, and communication tools

E. Financial Plan : . Revenue streams include employer subscriptions, university partnerships, and premium services, with a focus on sustainability and profitability

Thank you for your time and interest!
